Phone: (604) 875-4705
Fax: (604) 875-5072

WHEN SEX GETS DIFFICULT FOR PATIENTS WITH COGNITIVE LOSS

Many medical conditions create sexual difficulties including those that cause memory problems and cognitive loss. We have noted a need for improved understanding and management of sexual difficulties of couples in the community where dementia affects one or both partners.

We are pleased to announce that one of the physicians at our clinic has a special interest in sexual dysfunction in seniors with cognitive impairment and will see them on a priority basis for assessment as well as providing follow up as the disease progresses.

Referral and Contact Information

Telephone: 604-875-4705 **Fax:** 604-875-5072

Our referral forms are on both UBC and VGH websites:
